

Dear Partner,

This year we will organize the **20<sup>th</sup> edition** of the **Coatings Science International Conference (CoSI)**. We are planning to make it a celebration year, and a successful continuation for which we hope to count on your support.

First, we would like to inform you about our experiences around the **CoSI conference** in the past years. We are proud that in the past 19 editions we have been organizing a conference with high level scientific presentations, where knowledge exchange happens in an informal but efficient way, leading to many new contacts and professional relations between the participants. CoSI has therefore become a reference for the Coatings community, as it provides a *yearly* international platform for researchers and scientists, formulators, designers and industry/academic policy makers to exchange the latest developments of their disciplines. We keep the participants number up to a maximum of 120, and organize social activities, to maintain a cohesive group and maximize the interaction between participants.

The next **CoSI 2025 – 20th conference will be held from 30<sup>th</sup> June – 03rd July, 2025 in Noordwijk, the Netherlands.**

One again we will do our utmost to have the usual amicable and focused conference with a stable high quality and many interactions between industry and academic participants. A number of the presented papers will be published as scientific papers in Journal of Coatings Technology Research (Springer) and we normally hit the news on many Coatings related magazines, **PCI (Paints & Coatings Industry)**, **Coatings World**, **Coatings Tech Magazine**, and the **European Coatings Magazine** from Vincentz Network, who regularly visits CoSI and makes a report about the conference. We are also active in the media, namely with a **Linked-in** page. Altogether, there will be some good new opportunities to promote the conference and you as a Supporter.

We are confident that we will organize an interesting, lively and high-quality conference for the next year, which is also special as it is our 20<sup>th</sup> Anniversary! We are currently aligning a scientific program with excellent international speakers, both from industry and academia.

Hence, we would like to invite you to support CoSI 2025, in the form/extent that suits your company/institute the best. **We can offer four pre-set packages as shown on the second page. If, however, you have some other type of sponsoring and advertising in mind (e.g. sponsor the poster session; a coffee-break, lunch, dinner or social program; a small contribution for the award winners, etc)** feel free to contact us with suggestions and we will be happy to discuss further possibilities.

More information about the conference and sponsorships can be found at our website: <http://www.coatings-science.com>.

We are waiting for your, hopefully positive, response! If you have any further questions, please do not hesitate to contact us.

Yours sincerely,

Dr Catarina Esteves (Conference Chair)  
Eindhoven University of Technology, Eindhoven, The Netherlands
